NOTICE OF INDEPENDENT REVIEW DECISION

RE: MDR Tracking #: M2-03-1792-01

___ has been certified by the Texas Department of Insurance (TDI) as an independent review organization (IRO). The ___ IRO Certificate Number is 5348. Texas Worker's Compensation Commission (TWCC) Rule §133.308 allows for a claimant or provider to request an independent review of a Carrier's adverse medical necessity determination. TWCC assigned the above-reference case to ___ for independent review in accordance with this Rule.

___ has performed an independent review of the proposed care to determine whether or not the adverse determination was appropriate. Relevant medical records, documentation provided by the parties referenced above and other documentation and written information submitted regarding this appeal was reviewed during the performance of this independent review.

This case was reviewed by a practicing physician on the ___ external review panel. The reviewer has met the requirements for the ADL of TWCC or has been approved as an exception to the ADL requirement. This physician is board certified in neurosurgery. The ___ physician reviewer signed a statement certifying that no known conflicts of interest exist between this physician and any of the treating physicians or providers or any of the physicians or providers who reviewed this case for a determination prior to the referral to ___ for independent review. In addition, the ___ physician reviewer certified that the review was performed without bias for or against any party in this case.

Clinical History

This case concerns a female who sustained a work related injury on ___. The patient reported that while at work she began to experience neck discomfort that spread into both arms. The patient eventually underwent ulnar nerve releases and anterior transposition. The patient underwent an MRI on 10/1/98. The patient underwent a cervical myelogram on 5/5/99 that showed minimal anterior extradural defects at multiple levels of cervical spine. The patient underwent another MRI of the cervical spine on 1/21/03 that showed multilevel disc bulges and protrusions at the C2-3, C4-5, and C5-6 levels. EMG study dated 1/28/03 indicated a diagnosis of chronic C7 radiculopathy on the right. The patient has been treated with injections and conservative therapy. The patient has also undergone neck surgery.

Requested Services

Cervical CT scan.

Decision

The Carrier's denial of authorization for the requested services is upheld.

Rationale/Basis for Decision

The ___ physician reviewer noted that this case concerns a female who sustained a work related injury to her neck and both arms on ___. The ___ physician reviewer also noted that the patient underwent ulnar nerve releases and anterior transposition. The ___ physician reviewer further noted that the patient also underwent neck surgery. The ___ physician reviewer

indicated that the documentation provided does not demonstrate a clear rationale for request of a cervical CT scan. The ____ physician reviewer explained that there are other ways to determine whether the patient's fusion has occurred. Therefore, the ____ physician consultant concluded that the requested CT scan of the cervical spine is not medically necessary to treat this patient's condition at this time.

This decision is deemed to be a TWCC Decision and Order.

YOUR RIGHT TO REQUEST A HEARING
